

## **Foster Father Takes Only Terminally Ill Children**

Tears flowed from my eyes as I read about a man that is now taking care of a bedridden 6-year-old foster girl with a rare brain defect who is blind and deaf; has daily seizures; and her arms and legs are paralyzed. This devout Libyan-born Muslim has been taken care of her for all of her life. But the story does not begin there. He has been doing this type of care for more than two decades. He has buried about 10 children. Some died in his arms.

If you want to read about the most touching story about a person that gives and asks for nothing in return, you have to read this article that was in the L.A. Times, [\*'I know they are going to die.'\* This foster father takes in only terminally ill children.](#)

<https://www.latimes.com/local/lanow/la-me-ln-foster-father-sick-children-2017-story.html>.

A Libyan-born Muslim has been taking care of a terminally ill child for all of her life. On her sixth birthday, he lights the candles in a cheesecake and sits the blind girl on the kitchen table, holding the cake near her face so she could feel the warmth of the flames. This story, from the L.A. Times, brought tears to my eyes. Learn more by stopping by [www.sagethinging.org](http://www.sagethinging.org).
